

# ENERGY MANAGEMENT SYSTEM POLICY OF TOROS AGRI

At the Toros Agri-Industry Group, the value given to people, respect for the environment, and awareness of total quality management form the basis of our policy. Our aim is to leave a more livable and sustainable world to future generations in terms of environment and economy by increasing the energy performance in all our activities with an energy management system based on continuous development.

As Toros Agri, we apply and commit to the following principles to achieve this goal:

- We focus on using energy and natural resources efficiently in all of our activities and on continuously improving our energy performance with energy efficiency studies and improvement projects.
- To contribute to energy efficiency, we take the environmental sustainability approach as a basis and ensure the protection of natural resources (energy, water, electricity, natural gas, etc.) by using new technologies.
- We strengthen resilience against the climate crisis, which threatens all living beings on Earth and is felt more intensely each year, by minimizing company risks and turning them into opportunities through necessary research, efforts, and investments, thereby developing plans and strategies suited to new conditions.
- We follow the developments in the sector on a global basis, review and improve our management system according to internationally accepted standards. We carry out activities that will ensure continuous improvement and development based on changing conditions.
- We ensure the procurement of all necessary information and resources to achieve goals and objectives, and use all technical and financial means.
- We aim to increase our energy performance by choosing energy efficient products, services, and technologies in purchasing processes.
- During the design phase, we plan our design processes by taking into account the necessary practices to improve our energy performance.
- We raise awareness of all employees, including those of the subcontractors, on energy efficiency issues, and aim to create the necessary awareness and culture in all our employees.
- We make it mandatory for everyone to implement the relevant procedures and systems, and we request suppliers and collaborators to act in accordance with this management system.
- We promise to comply with applicable legal and other requirements regarding energy efficiency, energy use, and energy consumption in our operations.
- In this direction, we promise to continue our efforts to increase energy efficiency and reduce greenhouse gas emissions in our businesses.
